SCHEDULE

- 7:00 PM Enterprise City Offices, 375 South 200 East

PLANNING COMMISSION

- December 12

CITY COUNCIL

- December 13

ELECTED CITY COUNCIL- ROY ADAMS

With the New Year coming up before they take on their roles as City Council Members, The City would like to introduce your new and returning elected City Council Members.

Roy Adams is honored to be elected again to serve the residents of our beautiful town, he was born in St. George and raised in Enterprise. He graduated from Enterprise high school. He and his wife Kacee have

been married 20 years and have four kids ranging in ages from 19 to 11. Roy loves this town of ours and only wants what's best for it and it's residents and also generations to come! Roy wants to thank you again for supporting him and trusting him to do his part for our town.

ELECTED CITY COUNCIL- DELBERT STAHELI

Delbert was born and raised in Enterprise. He is the son of Stan and Charlene Staheli. He enjoyed all the benefits of growing up in this close-knit rural community. He graduated from Enterprise High School, following which he joined the Utah National Guard where he received the Distinguished Graduate Award. He then served eight years in the military reserve.

In 1980 he met and married his wife Linda Campbell. They are the parents of thirteen children. Along with raising his family, Delbert was involved in scouting for 40 years. He was awarded the Silver Beaver in 2004. His goal was always to promote scouting and help

young men develop leadership and gain self-confidence.

Delbert and his wife Linda moved back to Enterprise in 2011 wanting to give his children many of the same opportunities he enjoyed attending a smaller high school. Nine of his thirteen children graduated from Enterprise High.

He has been a small business owner for the past 33 years, most of which has been as a dental technician working for various dentists in Southern

Utah. Along with the dental lab, he and his son Derek Staheli started Discount Pawn nine years ago.

Delbert is looking forward to serving on the city council. He hopes people will feel free to contact him with their ideas or concerns.

ELECTED CITY COUNCIL- BILL FOWLER

Bill Fowler has lived in Enterprise for 18 years. Originally from Las Vegas, NV. Married to Melodie (Thomas) Fowler for 25 years. 5 children (Truman, Hunter, Chandler, Kenidie, and Alex). 2 Daughters in-law (Syd married to Truman and Celeste married to Hunter). 1 grandson (Liam) and another on the way (another grandson)

both from Hunter and Celeste. Bill has a real estate business and is excited to serve the residents of Enterprise as a councilman. He thanks you for your vote of trust.

NON-EMERGENCY DISPATCH

The Washington County Sheriff's Office would like the Enterprise Community Members to call in any problems that they see to the Non-Emergency Dispatch number. Even if you feel that they may not be able to get there in time to solve the problem, the Sheriff's Office has ex-

pressed that they need information about problems that we are seeing so that they have a place to start.

If you see something, say something and call the non-emergency line at 435-634-5730.

They can't help us if they

don't know what's going on. Thank you for your cooperation!

A representative for Senator Lee will be available to speak to anyone who would like on 12/14/23 from 3-5pm in the council chambers.

DOG VACCINATION CLINIC

There will be a dog and cat vaccination and licensing clinic on Saturday, February 3rd, 2024 at the Enterprise City Firehouse located at approximately 388 S. & 625 E. in Enterprise.

You can bring proof of dog spay and neuter to receive a reduced rate for your

dog license.

The veterinarian providing vaccinations is Dr. Bracken.

Keep an eye out next month for flyers for this clinic with more details on time and prices.

This is a great way to get all of your vaccines up to date at once and get your dog licensed at the same time.

NEW HIRE-MIKE COBB

Mike was born and raised in St. George, where he had a very active upbringing that included sports, boy scouts and the outdoors. Mike joined the Utah Army National Guard when he was 17 during his Junior year in high school. He later graduated high school at Snow Canyon High School and attended Dixie Junior College where he was working on his biology degree to become a game warden.

During his time at Dixie College, he met his wife April (Truman) and fell head over heels. Mike married April in December of 1998. He figured he needed to get a job so he could support his soon to be family and decided to drop out of college and go

to work as a plumber. He spent the next four years working for a few different plumbing companies while attending a 4-year plumbing apprenticeship program at Dixie Applied Technical College and earned his Master Plumbing Certificate. Mike spent the next 6 years working for plumbers in the local area and eventually started his own plumbing business. Mike later was offered a full-time position with the Utah Army National Guard, where he has worked in numerous positions and capacities over the years up until he recently retired.

Mike and April have 4 beautiful children and Mike has 1 special little buddy, "Hooley" (his dog). Dallee 20, Paislee 16, Keston 13, and Kaben 10. Mike's hobbies consist of anything horse related. He has a deep love for his horses and the equine community. He loves to work in the garden with April or pretty much any-

thing she is doing so they can spend time together. He loves to hunt, fish and camp as much as possible.

Mike is grateful to have this opportunity to work here for the City of Enterprise and is looking forward to serving the community and starting the next chapter of his life here locally.

SPORTS COURT KEYS

Don't forget that you can now purchase your own family key card to the City Sports Court!

Having your own key card will allow you to call and schedule the building without the hassle of coming into the City Offices to check out a key.

It's also a convenient option for weekends, so you don't have to worry about picking your key up before the offices

close on Friday and you don't have to worry about returning it.

If you use the sports court on a regular basis this really is the best option, especially when community sports are happening and most of the loaner keys are checked out to coaches.

The Key cards are \$30.00. If you are interested in purchasing a key, stop by the City Office and fill out an application. The \$30.00 fee can be

paid with cash or a check.

Keys are ready within a few days of purchase.

**The City Offices
will be closed
December 25th
& 26th for
Christmas.**

CHRISTMAS TREE LIGHTING CEREMONY

The Enterprise City Annual Tree Lighting Ceremony was held on Tuesday, December 5, 2023.

This year, community member Sherwood Bracken was chosen to light the tree. Sherwood is a long time resident of Enterprise and has lived a life of service and has served our community in a variety of ways. He has served as Mayor of Enterprise, on the County ASCS committee, the county hospital board, the Washington County Water Conservancy Board. He was president of the Enterprise Reservoir and Canal Board, Chairman of the Escalante Valley Water Users, and Chairman of the Washington County School Board. Sherwood also received an award from Southern Utah University for distinguished service. Together, with his wife Winnell, they have a wonderful posterity, many who live and serve in Enterprise as well. We are proud to have people like Sherwood who call Enterprise home and make it such a great place to live.

Those who attended the Tree Lighting were able to

enjoy the music provided by The Singing Sisters, The ACU Choir, The Frostettes, and The Enterprise Elementary School Students. A special thanks goes out to Jana Dunford for all of the work she does with the Elementary School Music program, Jennifer Shurtliff with the ACU choir, The Singing Sisters have performed at the Tree Lighting the past 7 years and the Frostettes for their hardwork preparing for their debut at the Tree Lighting this year! Hearing the beautiful music from all this year was a special treat.

Learn about Cross Connection Prevention

Water Is Life

PROTECT YOUR DRINKING WATER

LEARN
ABOUT
PROTECTING
YOUR HOME
FROM THE
DANGERS
ASSOCIATED
WITH
CROSS
CONNECTIONS!

What is a Cross Connection?

A Cross Connection is a physical connection (piping configuration) between the public drinking water system and anything else, including another water supply that can allow pollutants or contaminants to backflow into the public drinking water system.

What is Backflow?

Backflow is the reversal of flow from a residential or commercial system back into the public drinking water system. A backflow incident could carry dangerous pollutants or contaminants into our public drinking water supplies making them unsafe to use.

Backflow can occur if your plumbing system is physically connected (a cross connection) to any source of contamination or pollution. Examples of possible cross connections include landscape sprinkler systems, hose attachments for utility sinks, chemical tank trucks, chemical sprayers, and garden hoses.

The International Plumbing Code, as adopted by the state of Utah and the Utah Public Drinking Water Rules requires that all cross connections be eliminated or protected against backflow by installing an approved backflow prevention device or assembly.

What Can Backflow Into Your Water?

Many public drinking water systems are contaminated each year by pollutants or contaminants that backflow into the water system through unprotected cross-connections. Identifying and eliminating or protecting cross connections is a matter of public health!

Backflow Prevention Assemblies

Backflow prevention assemblies provide protection against contamination or pollution. A cross connection is defined as, "Any actual or potential connection between a potable water system and any other source or system through which it is possible to introduce into the public drinking water system any used water, industrial fluid, gas or substance other than the intended potable water." Cross connections and backflow incidences in the State of Utah have resulted in dangerous, highly contaminated water unexpectedly entering public drinking water systems. Irrigation waters, oil, toxic boiler compounds, sewage, pesticides, and other extremely dangerous contaminants have found their way into Utah public drinking water systems due to cross connections.

WHAT YOU CAN DO TO HELP PREVENT CROSS CONNECTIONS

There are many connections to our water distribution system. When connections are properly installed and maintained, the concerns are very minimal. However, unapproved and improper piping changes or connections can adversely affect not only the availability, but also the quality of the water. A cross connection may let polluted water or even chemicals mingle into the water supply system when not properly protected. This not only compromises the water quality but can also affect your health. So, what can you do? Do not make or allow improper connections at your homes. When the cross connection is allowed to exist at your home, it will affect you and your family first.

Your Garden Hose and Threaded Potable Outlets

A large majority of backflow incidents are created by the common garden hose. Modern plumbing codes require that all threaded potable water outlets (hose bibs or sill cocks), except water heater drains and clothes washer connections, be protected by a non-removable hose bib vacuum breaker or an atmospheric vacuum breaker. The installation of a hose bib vacuum breaker (HBVB) is an inexpensive way to protect against contamination happening through your garden hose.

Kitchen and Bathroom Faucets

Kitchen and bathroom faucets are generally designed with an adequate air gap between the end of the faucet and the flood rim of the sink. They are manufactured so that a hose can not be attached to the end of the faucet. Slip-on hose connections can defeat the protection of the airgap and should not be used!

Shower Sprayers

Hand held shower sprayers and other similar hose attachments also pose a problem. If submerged in the water, back-siphonage can occur. This problem can be corrected by installing a special hose vacuum breaker.

Laundry Room

Your washing machine has air gaps built-in at the factory. Utility sink faucets must be equipped with a hose bib vacuum breaker or atmospheric vacuum breaker.

Water Softener Drain Line

Drain lines from water softeners and water conditioners are typically connected to the sewer line. An air gap must be provided between the end of the drain line and the sewer line eliminate the possibility of siphoning raw sewage back into the drinking water system.

Drain lines from water softeners and water conditioners are typically connected to the sewer line. An air gap must be provided between the end of the drain line and the sewer line eliminate the possibility of siphoning raw sewage back into the drinking water system.

Toilets

Many toilets are equipped with ballcock assemblies that do not meet code. These assemblies can allow water from the toilet tank to be siphoned back into the drinking water supply. Anti-siphon ballcock assemblies must be used to protect against back-siphonage.

Landscape Sprinkler Systems

The Plumbing Code requires that all landscape sprinkler systems connected to the public water system be equipped with an approved backflow prevention device or assembly.

Any sprinkling system that can utilize both public drinking water supplies and secondary water supplies must follow specific plumbing regulations to prevent raw water from entering the drinking water system!

“ TOGETHER WE CAN ACHIEVE MORE ”

TRASH CAN REPAIR/REPLACEMENT

Sometimes your trash bins need repair or replacement. Washington County Solid Waste has noted some information for those who make these requests.

All requests for repairs, replacements and new deliveries will be serviced the next week. The service will be completed the next business day after trash pickup. If your normal trash day pick up is Monday, the request will take place on Tuesday.

Your trash man will not be the one completing your re-

quest. A tech in a WCSW pick-up truck will complete all repairs/replacements/new deliveries. The techs cannot take trash with them, so all garbage cans that need to be repaired or replaced must be emptied or your request will not be completed.

Your garbage can needing attention must be at the road. (The same place you leave it on trash pickup day.) Techs cannot and will not go into backyards, patios or behind gates. If you live in an HOA that does not allow cans to be on the road and visible

after a pick-up day, please leave a note on the can stating "Per Washington County Solid Waste my can(s) must stay out on the road for my service request to be completed. Please do not move." If your request cannot be completed, they will wait until you resubmit a request before putting you back on the schedule. IF WCSW has to reschedule your request due to your lack of following these guidelines, after the second attempt you will be charged a \$35 service fee.

If your garbage can is dam-

Enterprise City is a rural farming community located in Southwest Utah. The area raises some of the best hay, corn and kids. With several nearby lakes, boating and fishing opportunities are easy to find. Enterprise is the kind of place you like to call home and also like to come home to. The mountains also invite with their scenic beauty, atv and hiking trails, as well as some great hunting. At the end of August, Enterprise City hosts it's annual "Corn Fest", where the whole town turns out to celebrate small town life and the bounty that our local farmers produce.

Pioneer Settlers entered the area in the late 1800's and settled a few miles West of present day Hebron. Those industrious pioneers had a grand plan to build a large dam to help store a sizable amount of water for irrigating their crops during the dry summer season. This allowed them to irrigate far more land and to move farming into the broad valley East of Hebron. Soon a new townsite was plotted and most Hebron residents moved to present day Enterprise.

Enterprise Reservoir Dam

aged beyond what a garbage truck can do, (Melted, damaged with power/hand tools or run over by a vehicle) They will not complete your service request. You will have to call the office to pay for the can to be replace. 435-673-2813.

They do not replace cans due to smell, being dirty or old. It is your responsibility to clean or hire someone to clean your cans.
